exp Aug and Dec 2027			
Market Cap	\$4.6 M	~40% Management & Insiders	
as of Sept 16, 2026			

Greenfield Discovery Potential at Brownfield Risk Profile

Why MLO?

MLO concessions adjacent to the San Cristobal Mine and Isidorito Prospect

Expansion and acquisition oriented

Comprehensive geological compilation

Opportunities for additional staking

Why Bolivia?

Vast resource potential in the Cordillera and Amazon Craton

Low cost exploration

A new government committed to increasing foreign investment

Bolivia has world class mineral reserves yet is underexplored compared to peer countries
